Stan Ionuț-Raul

stan.ionut.raul@gmail.com My Portofolio

About

Computer Science graduate passionate about Front-End development, focused on building clean and engaging web applications. Curious about modern web technologies and motivated to grow into Full-Stack development. I enjoy creating projects that combine structure, creativity, and user-focused design while continuously improving my coding skills.

Skills

Languages: HTML5, CSS3, JavaScript
Frameworks & Libraries: React, Ionic
Architecture & Concepts: MVC Architecture, REST APIs, Responsive Design, Component-based development
Tools: Git, GitHub

Projects

Quiz Web Application

Tech stack: JavaScript, HTML5, CSS3, MVC Architecture, LocalStorage
User experience: Take quizzes, track scores, and view performance stats. QuizApp

- Built a modular quiz application with real-time scoring and answer validation
- Implemented dynamic question rendering and controlled quiz flow between questions
- Built a statistics dashboard displaying historical results with pagination
- Applied MVC architecture to separate UI, logic, and data management
- Persisted user progress using LocalStorage for session continuity

Travel Journey

Tech stack: JavaScript, HTML5, CSS3, REST APIs, MVC Architecture
User experience: Track trips, view live weather, mark favorites and put notes. TravelJourney

- Developed a modular travel exploration app intended to help users track visited destinations and organize travel plans
- Integrated external weather and image APIs using asynchronous fetch calls with proper error handling
- Implemented MVC architecture for scalable and maintainable code
- Designed responsive layouts to ensure usability across devices
- Managed dynamic DOM updates based on API responses

ZeroWaste – Mobile Application

Tech stack: React Ionic, JavaScript, CSS3
User experience: Manage products, view recipes, log in, make new account. ZeroWaste

- Contributed to the frontend development of a hybrid mobile application, building interactive and responsive user interfaces for managing household food and reducing waste.
- Implemented key UI components and pages, including login, signup, profile management, product lists, and recipe views.
- Applied component-based architecture to create reusable UI elements such as product cards, modals, forms, and recipe lists.
- Ensured responsive and user-friendly layouts, applying modern CSS and Ionic styling techniques.

MovieApp

Tech stack: React, JavaScript, CSS3
User experience: Browse, search, and view details of movies with React components.

- Built frontend components for a movie browsing app
- Implemented movie listing, search, and filtering using external APIs.
- Managed component state and props for dynamic UI updates.
- Practiced React + Vite setup, reusable components, and responsive design

Education

Babeș-Bolyai University — Bachelor's Degree in Computer Science 2022-Present
